

## Orchids Curse

### BAND STORY

"The Orchids Curse have been through 3 years of hell to discover their true sound... With each and every new song written the sound has progressed, increasing in not only brutality but in melody. Their debut EP Goodbye is when the Casket Closes (2006) has received praise and reviews around the globe continuing to build momentum in underground music circles. Now with a new 3-song demo recorded the boys are back and ready to aurally assault all those who stand in their way. The new tracks The Delicate Art of Dying(Despair), ...of the Flesh (Lust) and Let the Ashes Bury this Life (Anger) each lyrically focus on a specific human emotion, with new heights being achieved in the progressive nature of the bands song writing prowess. Currently the band is on a brief hiatus while the 3-song demo is finalized and put to good use but they shall return to their true home, the Stage, soon enough! "
